Introduction

At the kind invitation of the Korean Government, the XXVII IUSSP International Population Conference will be held at the BEXCO Conference Centre in Busan, Korea.

The IUSSP and the Korean National Organising Committee (NOC) expect up to 2,500 participants.

The Conference will open on Monday 26 August 2013 and conclude on Saturday 31 August 2013. The scientific programme includes 290 scientific sessions, 32 thematic poster sessions, four plenary and debate sessions, as well as training sessions, side meetings and exhibitions.

The General Assembly of IUSSP members will be held on Thursday, 29 August at 19:00 in the Grand Ballroom.

The Korean National Organising Committee (NOC) has organized an Asia-Pacific Day, which includes eight special invited sessions and a plenary, which will take place on 27 and 28 August. These special sessions will focus on unique demographic features of the region including population trends and changes in North Korea, socioeconomic development and population change in South Korea, lowest-low fertility, and the challenges of addressing rapid population ageing. There will also be several sessions that focus on recent information technology innovations, Smart Technology, and the impact these innovations will have on demographic issues such as population ageing, fertility, migration and health as well as their contribution to improving the collection and analysis of demographic data. The NOC plenary session on Wednesday 28 August will be followed by a banquet in the Exhibition Hall 1, 1st floor hosted by the Korean National Organising Committee to which all participants are cordially invited.

The International Organising Committee (IOC) and the NOC gratefully acknowledge the many people who volunteered their time and expertise to develop this Conference. The IOC is particularly grateful to the theme conveners and organizers of scientific sessions and to the hundreds of scholars worldwide who showed an interest in the Conference by submitting paper abstracts and preparing scientific papers and posters.

Introduction

A l'aimable invitation du gouvernement coréen, le XXVIIe Congrès international de la population se tiendra au Centre de conférences internationales BEXCO de Busan, en Corée du Sud.

L'UIESP et le Comité national d'organisation coréen(CNO) attendent jusqu'à 2 500 participants.

Le Congrès débutera le lundi 26 août 2013 et s'achèvera le samedi 31 août 2013. Le programme scientifique comprend 290 séances scientifiques, 32 séances de posters, quatre séances plénières et de débats, ainsi que des sessions de formation, des réunions parallèles et des stands d'exposition.

L'Assemblée générale des membres de l'UIESP se tiendra le jeudi 29 août à 19h dans la salle Grand Ballroom.

Le Comité national d'organisation coréen a organisé une Journée Asie-Pacifique, qui comprend huit séances spéciales invitées et une séance plénière qui se tiendront les 27 et 28 août. Ces séances spéciales porteront sur les particularités démographiques de la région, et notamment sur les tendances et les évolutions démographiques en Corée du Nord, le développement socio-économique et les changements démographiques en Corée du Sud, la très faible fécondité ainsi que les défis du vieillissement rapide de la population. Des séances seront également consacrées aux récentes innovations en matière de technologies de l'information et de la communication, et à l'impact de ces innovations sur les questions démographiques telles que le vieillissement de la population, la fécondité, les migrations et la santé, ainsi que leur contribution à l'amélioration de la collecte et de l'analyse des données démographiques. La séance plénière du CNO du mercredi 28 août sera suivie d'un banquet dans la salle Exhibition Hall 1, au 1er étage, organisé par le Comité national d'organisation coréen auquel tous les participants sont cordialement invités.

Le Comité international d'organisation (CIO) et le CNO remercient chaleureusement toutes les personnes qui ont bénévolement consacré leur temps et leur expertise pour réaliser ce congrès. Le CIO est particulièrement reconnaissant envers les responsables de thèmes, les organisateurs des séances scientifiques et les centaines de chercheurs qui, de par le monde, ont manifesté leur intérêt pour ce congrès en soumettant des résumés et en préparant des communications scientifiques et des posters.

Message from the President of the International Organising Committee

On behalf of the National Organising Committee, it is my great pleasure and honour to welcome all of you to the 27th IUSSP International Population Conference in Busan, Korea.

Busan, Korea's second largest city, is a place where tradition meets modernity in perfect harmony, encompassing picturesque shorelines, UNESCO World Heritage Sites and one of the world's largest shipbuilding yards in close proximity.

Mr. Peter McDonald, president of IUSSP, told the mayor of Busan that the number of those who submitted their papers for presentation at the Conference is greater than ever before. South Korean President Park Geun-hye and UN Secretary-General Ban Ki-moon have also paid particular attention to the Conference. To meet your expectations, we have made utmost efforts to prepare for the event.

We feel most privileged to be hosting this event as we are attaching an extra special meaning to it being held in our nation. Korea now stands at an important crossroads in its demographic transition. The population policy to once lower the birth rate in the past now needs to take a "U-turn" in the midst of a rapidly aging population with an extremely low birth rate in order to reverse the current trend and prevent significant population decline in the future.

I hope that the Conference will serve as an occasion to head for a better path towards demographic development by offering new models for the "future of the world and its population." I also hope that this conference, which gathers together participants from all over the world, will help you know Korea better.

Once again, I welcome all of you and I wish you a rewarding and memorable stay in Busan.

Park Un-tae,
President
The 27th IUSSP International Population Conference

Message du président du Comité international d'organisation

De la part du Comité d'organisation, je vous souhaite la bienvenue au 27ème Congrès international de la population de l'UIESP.

Ville hôte et deuxième grande ville en Corée, Busan marie tradition et modernité dans une harmonie parfaite. Un littoral remarquable, des sites inscrits au patrimoine mondial de l'UNESCO ainsi qu'un des plus grands chantiers de construction navale du monde sont ses atouts majeurs.

M. Peter McDonald, président de l'UIESP, a déclaré au maire de Busan que le nombre de celles et ceux qui ont remis leur article pour la Conférence n'a jamais été aussi important. Mme Park Geun-hye, présidente de la République de Corée, et M. Ban Ki-moon, Secrétaire général des Nations unies, y ont également manifesté un intérêt particulier. Afin de répondre à vos attentes, nous n'avons ménagé aucun effort pour la préparation de cette manifestation.

Nous nous sentons particulièrement privilégiés d'accueillir cet évènement car nous attachons une signification particulière à sa tenue dans notre pays. La Corée se trouve maintenant à une importante croisée des chemins en ce qui concerne sa transition démographique. La politique démographique, autrefois orientée pour faire baisser le taux de natalité, doit maintenant effectuer un virage à 180 degrés pour tenir compte d'une population rapidement vieillissante avec un taux de natalité extrêmement bas, dans l'objectif d'inverser la tendance actuelle et de prévenir un déclin significatif de la population dans le futur.

Je souhaite que la Conférence soit une occasion de converser d'un meilleur développement démographique, en proposant de nouveaux modèles pour l'« avenir du monde et celui de sa population ». Je souhaite également que la Conférence, qui rassemble des participants internationaux, vous incite à mieux connaître la Corée.

Encore une fois, je vous souhaite la bienvenue, et je vous souhaite un fructueux et mémorable séjour à Busan.

Park Un-tae

About IUSSP / *A propos de l'UIESP*

In addition to hosting an international conference every four years, the IUSSP sponsors a number of Scientific Panels that organize scientific meetings on a regular basis in order to examine specific scientific questions. Through its meetings and other activities, the IUSSP seeks to generate scientific information on population trends and stimulate interest in population issues among the scientific community, international and national organizations, governments and the general public. The IUSSP disseminates the scientific and policy information it produces to its 2,000 members and over 600 student associates located in 130 countries and other population specialists through its publications, website, newsletter, and announcements. Its books are published in the International Studies in Population series published by Springer. The IUSSP has consultative status with the Economic and Social Council of the United Nations, is a member of the International Social Science Council (ISSC) and the Council of Europe, and collaborates with a wide array of universities, non-governmental organizations and other institutions in carrying forward its activities.

****

En plus de son congrès international quadriennal, l'UIESP organise, à travers ses différents comités scientifiques des séminaires et ateliers internationaux portant sur des questions scientifiques spécifiques. A travers ces rencontres et d'autres activités, l'UIESP participe à l'étude des évolutions démographiques et s'efforce de susciter l'intérêt de la communauté scientifique, des organisations nationales et internationales, des gouvernements et du public en général en ce domaine. L'UIESP diffuse des informations scientifiques et politiques auprès de ses 2000 membres et plus de 600 étudiants associés, originaires de 130 pays, et à l'ensemble des spécialistes des questions de population, au moyen de ses publications, son site web, son bulletin et ses communiqués. Ses ouvrages sont publiés dans la collection International Studies in Population publiée par Springer intitulée. L'UIESP dispose du statut de consultant auprès du Conseil économique et social des Nations unies, est membre de Conseil international des sciences sociales et du Conseil de l'Europe. Elle collabore avec un vaste réseau d'universités, d'organisations non gouvernementales et d'autres institutions.

IUSSP Membership

The IUSSP is an individual membership association open to all scientists and professionals working in the field of population. With over 2000 members and 600 student associates from over 130 countries, the IUSSP is the largest international network of people interested in population studies. Members can contact each other via the membership directory and develop international and interdisciplinary networks to advance research on a given topic.

IUSSP members enjoy valuable benefits, including:

- An extensive professional profile page in the Membership Directory, where members can display information.
- Access to the member-restricted section of the IUSSP website, which includes the Membership Directory, job or research announcements, and working papers from IUSSP seminars.
- Direct access to calls for papers and other announcements sent by email.
- Newsletter with information on IUSSP activities and resources in the field.
- Reduced registration fees for IUSSP Population Conferences.
- Increased opportunities of participating in the scientific activities of the IUSSP.
- Discounts on subscriptions to major population journals.
- Discount of 25% on IUSSP volumes published in the ISIP series (Springer).

To apply for IUSSP membership please visit the IUSSP Website (www.iussp.org).
